

WHITE PAPER

STATE OF POLICING AND LAW & ORDER IN DELHI

(January to December 2014)

December 2015

COMMONWEALTH HUMAN RIGHTS INITIATIVE

The Commonwealth Human Rights Initiative (CHRI) is an independent, non-partisan, international nongovernmental organisation, mandated to ensure the practical realisation of human rights in the countries of the Commonwealth. In 1987, several Commonwealth professional associations founded CHRI. They believed that while the Commonwealth provided member countries a shared set of values and legal principles from which to work and provided a forum within which to promote human rights, there was little focus on the issues of human rights within the Commonwealth.

CHRI is based in New Delhi, India, and has offices in London, UK and Accra, Ghana.

PRAJA FOUNDATION

Praja is a non-partisan organisation working towards enabling accountable Governance. We have been operating in Mumbai since 1998 and have been coming up with reports on the performance of Elected Representatives and on thematic issues such as Civic Services, Public Health, Municipal Education, Crime and Policing and Affordable Housing. In October 2013, we started work in Delhi.

I. Acknowledgement

CHRI and Praja obtained all the data reported in this white paper through right to information requests made under the Right to Information Act, 2005. We gratefully acknowledge all the officials of the Delhi Police who diligently provided this voluminous information. We are also most grateful to – our Elected Representatives, the Civil Society Organisations (CSOs) and journalists who utilise and publicise our data and, by doing so, ensure that awareness regarding issues we discuss is spread to a diverse and wide ranging population. We would also like to extend our gratitude to all government officials for their cooperation and support.

This White Paper has been made possible by the support provided to us by our supporters and we would like to take this opportunity to express our sincere gratitude to them. We would like to thank the Initiative of Change (IC) Centre for Governance, a prominent organisation working on improving governance structures. Their insights into the policing and law & order situation in Delhi helped us to conduct this study. We also extend our thanks to Mr. Jacob Punnoose (former Director General of Police (DGP) Kerala) for providing valuable guidance.

CHRI appreciates the support given by our donors namely, European Union Fund and Friedrich Naumann Foundation, which enabled the production of this study.

Praja Foundation appreciates the support given by our supporters and donors, namely Dasra, TATA Trusts, Friedrich Naumann Foundation, Narotam Sekhsaria Foundation and Madhu Mehta Foundation.

We would also like to thank our group of Advisors. Lastly, and most significantly, we gratefully acknowledge the invaluable contribution of all the CHRI and Praja team members who worked tirelessly to make this report a reality.

II. Foreword

The basic right of any citizen is the right to live in a safe and secure environment without any fear, or the prospect of being a victim of crime. Unfortunately our country's capital fails in this area, especially with the number of crimes against women. The situation has not been helped by the tussle between the Delhi government, the Lieutenant Governor, and the central government over "control" of the Delhi Police. This impasse has contributed to the worsening law and order situation in Delhi.

In the Calendar Year 2014, there were 74,921 cases reported of theft, while burglary was 10,281. There were an alarming 1962 cases of rape reported in 2014, including 1818 rapes (u/s IPC 376) and 144 gang-rapes (u/s IPC 376D). There were 2,667 cases reported of assault to outrage modesty of women. Other crimes like murder (533), kidnapping/abduction (7186), and robbery (6396) were also registered in high numbers. Places like Outer Districts are notorious with highest numbers in crime (22,222) in comparison to other districts.

On improving the quality of statistical analysis of crime, this paper has given us the opportunity to experiment with different methodologies on how to count and represent crime statistics. This has revealed significant differences in total crime figures, from the same base data, depending on the method used. This suggests it is necessary to consider new and diverse ways to compile crime statistics.

The sheer number of complaints against police indicates the deficit of public trust. This is highlighted by the huge number of complaints received against police personnel (12872), with North East district being the highest (3012). The response of the internal disciplinary system must be interrogated, as in the 12,872 cases, only in a tiny proportion of 35 were FIRs registered against the police. A glance at the statistics of allegation-wise breakdown of complaints highlights the rot in the system with the majority complaints relating to misbehaviour, inaction and corruption.

There was an overall shortage of police personnel of 6% in 2014. The shortfall was most significant at the supervisory ranks of Additional Commissioner (37%) and Assistant Commissioner (36%). Amongst other functions, these officers oversee the investigation of heinous crime such as rape, murder, and kidnapping. The conviction rate in heinous crimes was 17% in 2014. Courts have observed that one of the reasons for low conviction rates is poor investigation. Shortages in these critical positions exacerbates this weakness.

In Delhi, the central government has the responsibility over policing and law and order, and as such the role of the seven Members of Parliament from Delhi gains special importance as they have direct responsibility over an area and issue, over which they can demand accountability from the central government. Still, the number of questions raised on crime by these MPs in Parliament during Budget'14, Winter'14 and Budget'15 were awfully low. They raised only 17 questions, and one MP did not ask even a single question on crime. Although women's safety is an important subject for the capital, the Delhi MPs raised only two questions in Parliament related to it.

The issue of control over the Delhi Police may remain a contentious issue between the state and central government. Currently, administrative control rests with the Lt. Governor of Delhi. But there is another crucial police oversight mechanism which is currently being underutilised - the State Security Commission (SSC) for

Delhi, consisting of the Lt. Governor, Chief Minister of Delhi, Commissioner of Police, Leader of the Opposition, other government functionaries, and crucially independent non-government members. However, since its inception in 2011, the SSC has had only five meetings over two years (January 2012 to December 2013), and none to date since 2013. Since the formation of the current government of Delhi, the SSC has not been re-constituted with the appointment of new independent members. It is necessary to prioritise the active revival of this important body.

Ordinary citizens of Delhi will be most concerned about their family's safety and security and less about who controls the Delhi Police. The governments of the day should focus their debate more on addressing the law and order issues of Delhi rather than indulge in political mud-slinging. Consensus is one of the hallmarks of democracy so, both the governments should ensure that they consult and collaborate with each other and the police, rather than compete to control the police. Those representing us either in the Parliament or the State Assembly should take cognisance of this and deliberate on creating a safe and secure Delhi!

III. Introduction

This White Paper is the outcome of a collaboration between the Praja Foundation and the Commonwealth Human Rights Initiative. Praja compiles and publishes data on crime and policing in Mumbai annually. Building on their work, combined with CHRI's expertise on policing, our two organisations came together in 2013 to produce a similar paper for Delhi.

This paper presents comprehensive data, covering January to December 2014, on select parameters related to crime and policing in Delhi, namely:

- Crime statistics, including breakdowns by district and police station
- Strength and shortfall of police personnel, with rank, district, and area-wise breakdowns
- Complaints against police
- Deliberations on crime and related issues by the Members of Parliament for Delhi
- Status of the Delhi State Security Commission

Based on these parameters, our aim is to provide a holistic view, in very objective terms relying solely on official data, of the state of crime and policing in Delhi, including the record of oversight by Members of Parliament and the State Security Commission. In doing this, we also want to make hard to access data and information available to as wide an audience as possible. A large part of public fear and distrust of the police is fed by little understanding of levels of crime, the police response, and the various reasons behind perceived poor police performance. Much of this fear and distrust would dissipate if there was more transparency and easy access to information. On examining what the data reveals, the Delhi Police, policymakers, and oversight institutions can consider what correctives are needed to take the agenda of better policing for all – the public and the police itself – forward.

As of 2014, Delhi Police was organised into six ranges, 11 districts, 54 divisions and 184 Police Stations.¹ Of these 184 police stations, 161 cover Delhi's 11 districts and receive all crime complaints. The remaining have very specific and limited jurisdictions and only register the crimes that fall under their jurisdiction.

RESEARCH METHODOLOGY

CHRI and Praja jointly drew up the list of data parameters, by slightly expanding Praja's template. We studied and learned about the structure and organisation of the Delhi Police, and also did our best to understand from Delhi Police personnel how and where data is maintained. Primary data on all the parameters was collected in 2014 and 2015 through filing Right to Information requests in all 11 districts of Delhi, inspections, and field visits to police stations. Crime statistics were collected only from the 161 police stations which cover Delhi's districts. As mentioned, we sought data covering the period January to December 2014. All the data comes from primary and original sources. To provide very brief context and additional research, we also reference relevant policy documents relating to the data parameters.

Collecting crime statistics

By far, the most challenging task was the collection of crime statistics. While there are growing online official sources of information on crime statistics, we wanted the original data for 2014 directly from the Delhi Police itself.

It helps to have some background on how crime statistics are collected and recorded in the country. Every year the National Crime Records Bureau publishes its annual “Crime in India” report which provides national crime statistics with various breakdowns. These national statistics are based on state-level data sent by the State Crime Record Bureaus (SCRBs). In states, police stations send crime statistics to district headquarters which send the consolidated information to the SCRB. It must be noted that the primary source of all information on reported crime is the First Information Report (FIR)², making the FIR the primary source of all crime statistics. As we went about collecting the data, we discovered how crime statistics are maintained and reported by the Delhi Police. This threw up significant learnings which impacted how we gathered the data on crime. The most significant and relevant to understand our study include:

- The police follow the “principle or major offence rule” to count and officially report crime statistics. Every FIR registered by the police lists all of the offences invoked by the allegations made in that particular case. In the majority of cases, a series of crimes is committed in the course of one incident or case. For statistical purposes, this makes it very difficult to classify or count each case as *one* crime. So in cases where an FIR contains more than one offence (which is virtually all), the police report only the most serious offence with the highest punishment, as per law, as the official crime statistic. This single offence is the only crime counted in state and national crime statistics even if the FIR in the case invokes, for instance, eight other offences.
- This means the total number of crimes will never tally with the total number of FIRs. It also means that there is under-counting of crimes in the official statistics. While this perhaps cannot be avoided when compiling state or national level crime statistics due to sheer volume, a detailed understanding of crime would require that every offence invoked in each case is examined. Statistical analysis of crime is complex. It requires diverse and interlocking methodologies, which are currently lacking.

We wanted to find a way to collect every offence invoked in each FIR and also represent the statistics in terms of the actual totals of each offence reported in each case, rather than solely rely on crime data which reported only the principle offence. Every police station in Delhi maintains detailed records of FIRs in two main registers: the “Crime head-wise” and the “Serial-wise FIR” register. After conducting inspections of records, we found that the serial wise FIR register is a chronological record of all the FIRs registered in a police station, containing the full details of each case, including *every* offence invoked in each FIR and the name of the Investigating Officer assigned to each case. It is updated daily, and some police stations maintain the data

²An FIR is a written document prepared by the police when they receive information about the alleged commission of a cognizable offence. It is the report of the information that *first* reaches the police about the occurrence of a crime or crimes.

contained in this register in electronic form as well, which provides a complete crime record of a particular period in consolidated form. For this study, we collected statistics of reported crime from 161 police stations by asking for the data from the serial wise FIR register and in doing so, we are also able to report crime statistics for Delhi based on the total count of each offence reported in each case.

Part A – Overall crimes in Delhi

Section I. Crime Statistics

Table 1³: Crimes reported in Delhi⁴ (Principle offence-wise)

Specific Crimes reported in 2014	Total Number of cases ⁵
Murder (Sections 302)	533
Attempt to murder (Section 307)	768
Rape (Section 376)	1818
Gang rape (Section 376D)	144
Assault on Woman with Intent to Outrage her Modesty (Section 354)	2667
Riots (Sections 147 to 151 and 153A)	153
Kidnapping / Abduction (Sections 363, 364A, 365, and 366 to 369)	7186
Cheating (Sections 419 and 420)	4479
Burglary (Day and Night) (Sections 454 and 457)	10281
Snatching ⁶ (Section 356)	7170
Robbery (Sections 392 to 394, 397 and 398)	6396
Dacoity (Section 395)	71
Hurt (Sections 323)	4528
Grievous Hurt (Sections 325,326, 326A and 326B)	563
Theft (Sections 379 to 382)	74921
Extortion (Sections 384 to 389)	235
Rash driving (Section 279 read with 337 and 338)	10373

Inference:

The above table represents specific crimes reported in the National capital territory of Delhi for the calendar year 2014. Theft is by far the highest crime reported at a whopping 74921, followed by rash driving at 10373 and burglary at 10281. Snatching at 7170 reported cases and robbery at 6396 come fifth and sixth respectively. This indicates that these kinds of economic offences are highly prevalent in the city. Also, reported cases of rash driving are at an alarming level. A total of 1962 cases of rape and gang-rape were reported in 2014. A total of 533 murder cases were reported.

³ The police maintain crime statistics according to crime heads which are combinations of Indian Penal Code (IPC) sections. Crime heads are set by the National Crime Records Bureau (NCRB). This table is based on the set crime heads for these crimes.

⁴ Crime data from 161 police stations of NCT of Delhi from January to December 2014.

⁵ This is the total number of cases according to the “principle offence” method used by the police. For the crimes listed above, the number of cases are the total number in which the offence was the one with the highest punishment in each FIR, and thereby taken as the only counting unit.

⁶ “Snatching” is police nomenclature to refer to the offence in Section 356 IPC, which is assault or criminal force in attempt to commit theft of property carried by a person

Table 2: Crimes reported in Delhi (Section wise⁷)

Specific Crimes reported in 2014	Total number
Murder (Section 302)	553
Attempt to murder (Section 307)	861
Rape (Section 376)	1889
Gang rape (Section 376D)	154
Assault on Woman with Intent to Outrage her Modesty (Section 354)	3072
Riots (Sections 147 to 151 and 153A)	474
Kidnapping / Abduction (Sections 363, 364A, 365, and 366 to 369)	8023
Cheating (Sections 419 and 420)	4927
Burglary (Day and Night) (Sections 454 and 457)	10442
Snatching ⁸ (Section 356)	7285
Robbery (Sections 392 to 394, 397 and 398)	7483
Dacoity (Section 395)	78
Rash driving (Section 279 read with 337 and 338)	10373
Hurt (Sections 323)	7771
Grievous Hurt (Sections 325,326, 326A and 326B)	680
Theft (Sections 379 to 382)	92995
Extortion (Sections 384 to 389)	346

Note: The crime figures in this table were calculated by totalling each Section invoked in each FIR. In contrast to the principle offence method, here, each offence listed in an FIR was counted to get the total crime figure for that crime head. This indicates the frequency of each crime reported, irrespective of its gravity. Crime figures calculated through this method can be used for in-depth analysis.

⁷ As per the total number of each Section invoked in each FIR

⁸ “Snatching” is police nomenclature to refer to the offence in Section 356 IPC, which is assault or criminal force in attempt to commit theft of property carried by a person

Extortion (Sections 384 to 389)	235	346	111	32%

Inference:

This table indicates the difference in crime figures when calculated by the principle offence method, and by totalling each Section invoked in each FIR. Overall, there is a difference in all the crimes listed here¹³, with higher total crime figures in column B. This indicates that there can be under-counting in the principle offence method. The most significant difference is in the total number of Riots cases at 68%. The second significant difference is in the total number of Hurt cases at 42%, this may be because Hurt is most often invoked with a graver crime and so it becomes invisible in counting as per the principle offence method. It is notable to point out that there is a difference in the crime figures for all the crimes against women listed here – Rape at 4%, Gang rape at 6%, and Outraging Modesty at 13%.

⁹As per the “principle offence” method.

¹⁰ As per the total number of each Section invoked in each FIR

¹¹ These percentages are rounded off to the nearest whole number.

¹² “Snatching” is police nomenclature to refer to the offence in Section 356 IPC, which is assault or criminal force in attempt to commit theft of property carried by a person

¹³The sole exception is rash driving

Inference:

This table represents the crime figures calculated by totalling each Section invoked in each FIR across all the 11 districts of Delhi. The crime figures in this table exceed the crime figures of the previous table due to the different method used in calculating the figures. According to this table, the highest number of Rape was reported in the South District.

Cruelty by husband or relatives (498A)	3247
Rape of Minors ¹⁸ (female) (Section 376 IPC read with Sections 3 to 10 POCSO Act)	687

Inference:

The table above shows the specific sexual offences and other crimes against women reported in Delhi. Please note that Sections 326A, 326B, 354A to 354D are relatively new offences which were codified in the Indian Penal Code only in 2013.¹⁹The crime most reported in 2014 was cruelty by husbands and relatives at 3247. In 2014, there have been an alarming number of 161 Dowry Deaths in Delhi. Of the offences most recently brought into law, the crime most reported was Sexual Harassment at 1559, followed by Stalking at 1193. There was significantly high reporting of Section 509 (Word, gesture or act intended to insult the modesty of a woman).

¹⁷The figures in this table are calculated as per the total number of each Section invoked in each FIR

¹⁸ Rape of minors is the total of Section 376 IPC read with offences in Sections 3 to 10 of the Protection of Children from Sexual Offences Act, 2012.

Inference:

This table shows the offences reported under Special Laws in Delhi. The highest number of cases were reported under the Delhi Prevention of Defacement of Property Act at 2878, followed by cases under the Delhi Excise Act. There was high reporting of cases under the Arms Act (1264) and the Electricity Act (1229).

Inferences:

The above data represents the numbers of police personnel, rank-wise, with figures of sanctioned posts, and the actual number of working personnel. In 2014, the total strength of the Delhi Police was 77,083. There was an overall shortfall of 6% in the Delhi Police. Notably there was a surplus at the ranks of Special and Joint Commissioner of Police, and shortfall downwards from Additional Commissioner all the way to Constable. The highest shortfall was at the ranks of Additional Commissioner (37%) and Assistant Commissioner (36%), resulting in the lack of these supervisory officers in the Delhi Police.

The above table represents the total numbers of police personnel, district-wise, with figures of sanctioned posts, and the actual number of working personnel. South East District had the highest shortfall at 13% in 2014, followed by New Delhi district at 11%. Overall, there was a shortfall of police personnel of 7% across districts of Delhi in 2014.

²⁴Please be clear that represents only the total figures of police personnel working at the district level as of 31st December 2014.

Section IV. Complaints against Police Personnel

Statistical analysis of complaints against police is a valuable, and underutilised, tool to understand trends and patterns in the nature and volume of complaints against police, individuals being complained against, district-wise concentration of complaints; and lastly, the action being taken against complaints. This analysis can provide powerful evidence of deficiencies in a police department's practices of supervising and disciplining its police officers; which in turn can be used to correct and strengthen internal disciplinary processes.

The process in Delhi can be summarised as follows. Every office of the District Commissioner of Police (DCP) has a Complaints Branch, where all complaints against police are directly received from the public and recorded in a complaints register. The complaints are then sent to the Public Grievances cell in the office of the Assistant Commissioner of Police (ACP) of the concerned subdivision. An Investigating Officer, of the rank of Sub Inspector or above, is assigned to do a preliminary enquiry of the complaint. Once the preliminary enquiry is done, and the ACP finds it can be substantiated, it is sent back to the DCP's office where it is entered in the 'Substantiated register'. Departmental enquiries are initiated only for complaints which are found to be substantiated and classified as serious. When a departmental enquiry finds prima facie evidence of the commission of a cognizable offence, an FIR is registered against the implicated police officers.

Not all complaints against police go through the process of departmental enquiry. Complaints which allege what amount to cognisable offences are immediately forwarded for registration of FIR against the police personnel concerned.

The following table represents data on the complaints against police and action taken by the police departments from all the 11 districts of Delhi.

Table 11: District wise complaints against police personnel in 2014

Name of District	Total number of complaints received against police	Complaints closed without inquiry	Complaints in which 'Departmental Enquiries' were initiated	Complaints in which 'Departmental Enquiries' were completed	Complaints in which 'FIRs' were registered against the police officer/s concerned	Complaints in which 'Charge-sheets' were filed against the police officer/s concerned

South West District	no separate record maintained	no separate record maintained	14	3	6	0
Total	12872	0	46	13	35	9

Inference

In 2014, a total of 12872 complaints were received by the police against police personnel in Delhi.²⁵ The highest number of complaints (3012) was reported in North East district, followed by South district (2103). The least number of complaints were filed in Outer district. Barring South West district for which the information is not available, the data reveals that no complaint was closed without enquiry. The highest number of departmental enquiries were initiated in South West district (though total complaints received is not known). The highest number of FIRs at 12 was registered against police personnel in West district, of these, chargesheets were filed in only in 8 cases. Across the districts, departmental enquiries were initiated only in 46 cases and completed only in 13. A total of 35 FIRs were registered against police personnel, and only 9 charge-sheets filed.

²⁵This does not include the total complaints received in South West district as there is no separate record of total complaints received maintained in the district.

Table 12: Allegation-wise breakdown of Complaints against Police personnel in 2014

Name of District	Non-registration of cases	Beating	Corruption	Improper investigation	Misbehaviour	Inaction by police	Sexual harassment of women	Torture	False case	Other
Central District	30	23	175	25	47	0	156	7	58	-

East District	31	*	110	**	*	**	0	*	0	*Beating/Torture/Harassment/Misbehaviour (180); **Inaction by police/Improper investigation (187)

Inference:

The above table represents the breakdown allegation-wise of complaints received against police from 5 districts of Delhi. Four districts - **West District, North district, North West district and South West district** - do not maintain a separate record of the allegation-wise breakdown of complaints received against police. **North East and Outer districts** maintain records though these have to be accessed manually.

Inferences:

The above data represents the number of Questions asked by MPs on crime. Please note that Manoj Tiwari did not ask a single question on crime issues, including on policing or the criminal justice system.

Out of the total 334 questions asked by the MPs for Delhi in the above period, only 17 questions were somewhat related to crime or policing.

Section VI. STATUS OF STATE SECURITY COMMISSION OF DELHI

The State Security Commission (SSC) is an independent police oversight body recommended by the Supreme Court of India in the landmark Prakash Singh judgment²⁸, and forms part of a package of seven directives aimed at systemic police reform. The SSC is to act as a buffer between the police and the political executive, and is to have the presence of independent non-government members. The SSC is designed to be a policy-making body with the principle mandate to set standards for policing and evaluate police performance.

The Central Government constituted a separate Security Commission for the National Capital Territory (NCT) of Delhi, by an official memorandum dated 10 January 2011.²⁹The composition for the SSC was as follows:

1. Lieutenant Governor (LG), Delhi – Chair
2. Chief Minister, Delhi - Member
3. Leader of Opposition in the Delhi Legislative Assembly- Member
4. Joint Secretary in charge of the UT Division, MHA - Member
5. Commissioner of Police – Secretary / Convenor
6. Five Independent Members selected by the Administrator³⁰ from a panel prepared by the Search Committee constituted for the purpose by the Administrator.

The functions of the Delhi SSC broadly include the framing of broad policy guidelines for promoting efficient and accountable policing in accordance with law, identify performance indicators to evaluate police functioning, and review and evaluate organisational performance of the Delhi Police. This is a wide and significant mandate which if exerted could impact and strengthen policing across the board.

Since inception to date, Delhi’s Security Commission has met only five times, on 19 March 2012, 11 May 2012, 14 September 2012, 17 January 2013 and 6 September 2013.

According to the minutes of the meetings, the following independent members were present during these meetings:

- Ms. Renana Jhabwala, Self Employed Women’s Association (SEWA)
- Professor Shyam B. Menon, Vice Chancellor, Bharat Ratna Dr. B. R. Ambedkar University
- Retired Justice C. K. Mahajan
- Professor Najeeb Jung, Vice Chancellor, Jamia Millia Islamia University³¹
- Mr. Praveen Swami, Deputy Editor, *The Hindu*

²⁸ *Prakash Singh and Ors v Union of India and Ors(2006) 8 SCC 1*

²⁹ Government of India, Ministry of Home Affairs Memorandum No. 14040/127/2010-UTP, 10 January 2011.

³⁰ The “Administrator” of Delhi is the Lieutenant Governor according to Article 239AA(1) of the Constitution of India.

³¹ Najeeb Jung was subsequently appointed the Lieutenant Governor of Delhi in 2013. It is unclear whether the vacant post of independent member has been filled.

Despite the infrequency of meetings, the meetings when held discussed important issues. Some of the key policy suggestions put forth by independent members in particular were that **Crime Mapping should be done regularly and policing should be intensified by posting more police personnel in areas that register a spurt in crime during a particular period.** For ensuring safety of women, crime prone areas and trouble hotspots should be identified where more offences are reported for sexual harassment or stalking. More police should be deployed near girls' schools and colleges.³² CCTV can act as a major deterrent and be installed in as many public places as possible and the police should monitor the content being captured.

The fourth meeting, held on 17 January 2013, specifically focused on the issue of safety of women in light of the gang-rape incident of 16 December 2012.³³ One of the independent members stated that the gang rape incident should be taken as an opportunity to **fill-up all the vacancies of Delhi Police in terms of manpower** and a clear five-year timeline could be drawn up in this regard. The member expressed the need for an independent crime survey so that crime could be better understood, as cases registered by the police are not indicative of the factual position on the ground. Also, police stations do not have the requisite investigative competence to investigate crimes against women and there is a need to strengthen the crimes against women cells in each district. Other practical recommendations included to increase police station personnel; guide deployment; upgrade police stations; improve measures for women's safety; introduce crime mapping; welfare of police personnel, community policing, training and various guidelines on police service delivery and ensuring lawful arrest and detention. The Commission consistently reviewed its implementation as well. Each set of minutes were followed by a comprehensive 'Action Taken' Report setting out the compliance of the actionable points raised during the meeting.

All of this taken together indicates the potential of the SSC to improve policing.

Since September 2013, no meeting of the Security Commission of Delhi has been held. After the newly elected government of NCT of Delhi began its term in 2013, a proposal for re-constitution of the State Security Commission was sent to the Principal Secretary of the LG³⁴ which is still under consideration. Crucially, reconstitution will mean appointing new independent members. No new independent members have been appointed to date.

³² Minutes of Meeting, Security Commission for NCT of Delhi dated 19 March 2013.

³³ This refers to the tragic case of a young woman who was gang-raped on a moving bus and subsequently died from her injuries.

Chief Minister, Delhi	A	P	A	P	
Leader of Opposition in the Legislative Assembly	P	P	A	P	
Principal Secretary	P	A	P	P	
Delhi Commissioner of Police	P	P	P	P	

Inference:

As the Chair of the SSC, the LG was present only in one meeting between 2012 and 2013. It is noted that the Delhi Police Commissioner was present for all the meetings. This low frequency of meetings is far too less for a body designed to make a long-lasting impact on policing and which is mandated to systematically evaluate the performance of the police. It is strongly urged that the SSC is reconstituted with the full five independent members at the earliest, with no further delay. It is recommended that the Commission meets at least once every three months to work effectively.

Inference:

The table shows the rank-wise shortfall of police personnel in North East District, including a gender breakdown of working personnel. Highest shortfall in the total strength of police personnel was in the Sonia Vihar police station, followed by Jyoti Nagar. Data about the working strength of Female inspectors was not provided by the North East district. Harsh Vihar police station had the lowest numbers of female personnel working with only 7 women constables, and no other women police including Investigating Officers.

Inference:

In North District, highest shortfall in total strength of police personnel was in Timar Pur police station, followed by Burari. Data about the working strength of women Inspectors was not provided by the North district. Most of the police stations of North district had more working staff than the sanctioned strength. But notably, the number of women at the ranks of Sub-Inspector and Inspector were relatively less, which means there would have been less women Investigating Officers (IOs), whereas crimes against women were quite high in this district.

Inference:

In South District, highest shortfall was in the Hauz Khas police station, followed by Vasant Kunj South. Data about the working strength of Female inspectors was not provided by this district. Lodhi Colony and Vasant Vihar police stations had a surplus of working staff over sanctioned strength. Notably, the number of women at the ranks of Sub-Inspector and Inspector were relatively less, which means there would have been less women Investigating Officers (IOs), whereas crimes against women were quite high in this district.
