MANIFESTO OF THE
CITIZENS OF MUMBAI !

MANIFESTO OF THE CITIZENS OF MUMBAI !

Mumbai, the financial capital of the country, has a municipal corporation with a financial budget of 37 thousand crores and about 51 thousand crores fixed deposits. Mumbai Municipal Corporation will have its five-year elections in the near future. The city of Mumbai has witnessed many elections so far. However, this election is very different as compared to all the previous elections and in a true sense it will give a direction to the development of Mumbai, give it a human face and this election will try to find definite answers for problems faced by the city, after due discussions on the natural beauty of Mumbai, the natural resources available here and the challenges created due to urbanization.

Dear voter brothers and sisters, as we present the Manifesto of Bharatiya Janata Party before you, which is nothing but the '**Manifesto by Mumbai citizens**', we are confident and sure and we are committed to the same. The reason for this is very clear. In our country, the government formed by the Bharatiya Janata Party under the leadership of Prime Minister Narendra Modi has been working for the agenda of holistic development of the country and uplift of the poor people. Similarly, in Maharashtra, the BJP government has been making remarkable progress under the leadership of Chief Minister Devendra Phadnavis by insisting on transparent administration. The BJP state government, which passed the Service Guarantee Act in the very first cabinet has received accolades from the people from day one.

Prime Minister Narendra Modi declared a war against corruption and the entire population of our country has supported him. All of us are a witness to this.

At such a time, some fundamental changes are necessary for accelerating the speed of development of this city, which is the financial capital of our country, and for effectively implementing the agenda for transparent administration. BJP has the desire, vision and necessary support from central and state government to carry out the same. Therefore, we are presenting before you, a time bound program for the development of the citizens of Mumbai. This is a roadmap for the holistic development of Mumbai. We are sure that the citizens of Mumbai will not believe in any emotional appeals and will support BJP for the transparent administration and will support the development of Mumbai. We are sure that the citizens of **Mumbai will not believe in any emotional appeals and will support BJP for the transparent administration and will support the development of Mumbai.**

Provision of **Rs. One thousand crores has been made as a special fund for the poor**, to fulfill the basic needs of every poor citizen of Mumbai, such as health, education, employment, self-employment, housing, clean surroundings etc. and for enhancing the quality of the facilities.

While preparing this manifesto, the committee of people's representatives and experts appointed by BJP presented their ideas. Besides this, BJP made all out efforts to know about the aspirations and suggestions of the citizens of Mumbai through the social media. Chief Minister Devendra Phadnavis also appealed to the general public through the social media. As a response to his appeal, 7 lakh people recorded their opinions. The Chief Minister also had a direct online communication with the people. Therefore, this is the first time that such a manifesto is being prepared with a totally transparent process and with the participation of the citizens of Mumbai, which in itself is the first step towards a transparent administration.

This is the manifesto of the citizens of Mumbai, which is created from the suggestions offered by the Mumbai citizens and hence BJP will strive to fulfill the expectations of the citizens of Mumbai about the city of Mumbai. Your one vote will definitely decide the present and future of Mumbai.

Thanking you,

Adv. Ashish Shelar
MLA, Chairman, Mumbai BJP

A promise of transparent administration

- In Mumbai Municipal Corporation, there are some contractors from the same town who have continued to deliver very low quality work for years together. The cartel of such contractors will be put to an end and legal **Administrative Reforms** will be implemented so as to allow big contractors to work for the Municipal Corporation's infrastructure services on Deferred Payment basis.
- Municipal Corporation will enter into Joint Venture with leading companies, government/ semi-government enterprises as also with state government owned conglomerations such as M.S.R.D.C. for the contract work in Mumbai Municipal Corporation.
- Changes in the laws will be effected to make it compulsory for the officers in the Municipal Corporation, employees, corporators, contractors and their families to declare the information of their annual balance sheets before the public.
- The persons who are involved in or helping to create cartels for tenders and deliver low quality work for years together as also the persons involved in opposing the E-tender process will be booked under 'organized crime' and the necessary changes in the law will be effected.
- The information about proposed and sanctioned proposals of the Mumbai Municipal Corporation will be published in a transparent manner for the citizens of Mumbai, through media such as newspapers, web sites, face book etc.
- Every six months, the information about funds allotted to the corporators , (akasmik nidhi), the list of proposed/ sanctioned/current work projects under the funds sanctioned under the budget / the names and phone numbers of officers supervising such projects/ names and phone numbers of the contractors , the guarantee period of the contract will be included in a booklet which will be created in print form and electronic form and the same will be made available to the citizens of Mumbai free of cost.
- To protect and increase the income of Mumbai Municipal Corporation, the citizens who give information about thefts and the persons involved in the theft or help to increase the income of the Municipal Corporation by giving such information, will be given 10% of the amount so saved, without disclosing their names !
- A 'Up-Lokayukta' designation will be created as per the present laws in the Mumbai Municipal Corporation jurisdiction , for the citizens of Mumbai.
- Whenever the citizens of Mumbai lodge complaints, these complaints are finally entangled in the maze of the legal department procedures of the Municipal Corporation. Hence, it will be made compulsory to conduct one year's audit of the Chief Law Officer through a retired judge and to present its report before the Standing Committee ! Also, the entire legal department will be modernized !
- Every year, an audit of the balance sheet of Mumbai Municipal Corporation will be carried out and its report will be published in a simple language for the common public.
- If there are variations in the given contracts then a **Third Party Audit** will be carried out for the same! This audit report will have to be sanctioned by the members of the Sub-Committee of the Standing Committee and then it will be presented before the Standing Committee!
- In one year, suggestions and proposals will be invited from the citizens of Mumbai , about rights of the citizens of Mumbai regarding essential services - facilities and accordingly necessary changes will be proposed in the Municipal Corporation's regulations, public hearing will be arranged for the same and the concerned changes will be implemented within one year !
- All the decisions of Mumbai Municipal Corporations will be taken only in the building of Mumbai Municipal Corporation.

- The detailed report on the complaints submitted by the citizens of Mumbai and the action taken for them will be informed to the citizens by SMS, also the said report will be made available before the Ward Committee for discussion !
- A review of the traditional tender process, which was not a transparent process and which has been going on for years together, the farce of inviting consultation from consultants, opinions from experts, scheduled rate, earnest money etc. will be carried out by expert committee and their suggestions will be implemented within six months!
- As per the **Right to Service Act**, a **Right to Municipal Service Act** will be proposed and **Citizen Charter** will be established !
- It will be made compulsory for the elected corporators to conduct Area Meetings under the 'Nagarraj Bill' !
- The entire administration of Municipal Corporation Head Office and Divisional Office will be connected through video conferencing, so that the divisional office employees can save time and they would be available to the citizens for maximum amount of time !
- **Financial Incentive** will be given to those citizens in Mumbai who will carry out all services, facilities, transactions hundred percent cashless!
- A separate mobile app will be created for the Municipal Corporation and the facility will be made available through the same for the citizens to submit their suggestions and complaints !
- A **Special Force** will be established to implement the suggestions given in the internal and external audit report of the Municipal Corporation.
- An inquiry of the Educational, Health and other projects, initiated during the last twenty years in the Municipal Corporation under P.P.P. contracts and their current status will be carried out by a retired judge !

Mumbaikars' Right Of Water - Water For Anyone Who Asks For It

- 24 hour water supply will be provided for the entire city of Mumbai !
- For the next 5 years, 750 liters per day per family, the water tax rates will not be changed ! (The 8% increase every year will be cancelled)
- **Right to water** - Whosoever applies for water will be supplied water and wherever there is no tap connection, Municipal Corporation will supply water through tankers !
- In Mumbai city, approximately 25-30% water is unaccounted for. Everyday, in case of the water flowing from the source, there is leakage and theft of 750 million liters till the time it reaches the citizens of Mumbai. A detailed study about this will be carried out and in the next five years the unaccounted for water-leakage will be stopped!
- Last year 4.6% complaints were received regarding contaminated water, so equipments such as leakage detectors, underground sensors, electronic equipments will be used in the water leakage investigation department and the complaints about contaminated water will be resolved !
- The **Ground Water Level** has gone down. A time bound program will be designed to fight this dreadful problem and will be implemented immediately !

— * — * — * —

भाजपा

- The Water Projects at Gargai, Pinjal, Damanganga will be completed and 3200 MLD additional water will be made available for the citizens of Mumbai !
- The Water Purification systems will be improved !
- For the protection of bigger main water lines, along with the security guards, E-security guards, i.e. C.C.T.V. cameras will be fitted.
- Modernization of Water Hydrant will be carried out for prompt emergency management and removal of complaints about contaminated water. The Water Hydrant will be cleaned with a time bound program.
- To stop the monopoly of the licensed plumbers, an area-wise panel of the licensed plumbers will be prepared and fixed rates will be decided for the services offered and these will be made available to all the citizens.
- A processing plant will be established to convert the saline water of the ocean into potable water.

— * — * — * —

Good Roads - A Right Of Citizens Of Mumbai

- The policy of making roads in Mumbai free of potholes in five years will be implemented and till then the atrocious street tax will be abolished to offer justice to the citizens of Mumbai !
- To solve the problem of traffic jams in the roads due to the bottle necks where road widening work has not been done, a policy will be implemented to give double FSI at the same place or double financial compensation to the people affected by the road widening work !
- Along with the Elevated Railway (Rail on Rail) scheme of the central government, a network of elevated roads near the rail roads will be created by the Municipal Corporation. The construction of new 250 k.m. elevated roads will be taken up in Mumbai!
- As per Municipal Corporation Act, clause 61(N), it is mandatory to wash the roads and clean the roads. One thousand k.m. long roads in Mumbai will be washed under the 'Dust free Mumbai' campaign, with the help of processed waste water, processed in the proposed waste water processing centre.
- The clauses for Utility Duct, street furniture will be included in the road contracts, so as to avoid frequent digging of the roads.
- Large parking places, underground parking and rickshaw and taxi stands will be created at railway stations, bus stands, government, semi-government, municipal corporation premises and crowded public places.
- **SATIS - STATION AREA TRAFFIC IMPROVEMENT SYSTEM will be implemented SATIS factorily**

— * — * — * —

Flood Free Mumbai

- Additional FSI will be given to the residents residing in the low level areas, which suffer from floods, to accelerate the process of redevelopment of their property and accordingly changes will be made in DCR and the standard of life of the citizens of Mumbai who are residing on ground floors and suffering from the floods will improve after such redevelopment.
- Additional Water Expressing Centers will be established to drain the rain water speedily at Mahul, Somaiya Nalla, Gajdharbandh Nalla, Mogara Nalla etc.
- A network of small rain water lines will be created on the roads in Mumbai and the missing links in the same will be found out to make the water flow network complete.

— * — * — * —

Sewerage System For Entire City Of Mumbai

- If connectivity to the network of sewerage systems is not available for the buildings developed in Mumbai, then for such building the sewerage benefit tax will not be applied till the connection to sewerage systems is given for them.
- Immediate attention will be paid to the 50% un-sewerage areas in Mumbai city and a time bound program will be established to create a network of sewerage systems in the entire city of Mumbai and the sewerage connection will be made available to anybody who applies for the same.
- The Municipal Corporation will establish eight S.T.P. (**Sewerage Treatment Plant**).
- In the remote areas - hilly areas the modern technologies such as micro-tunneling will be used.
- S.T.P.s will be established in government and municipal corporation buildings and complexes for the re-use of waste water.
- S.T.P.s will be made compulsory for re-use of waste water in industrial areas, commercial complexes, non-residential offices and big residential complexes.
- The water which will be available for re-use after processing the waste water will be used for lawns and trees on the road dividers and traffic islands.
- The water which will be available after processing the waste water will be made available for washing to railway/metro/BEST/S.T./ private vehicles. (In Mumbai city, there were 28 lakh registered vehicles as on March 2016. For each vehicle 40 liters of water is used, i.e. for all the vehicles in Mumbai daily 1.2 million liters of water is used, this will be stopped and the processed water will be used.)
- To avoid thefts of the lids of chambers of the sewerage lines, as also to avoid pot holes in the roads created due to the pressure of the lids, new lids made from fiber will be user.

— * — * — * —
