

## Praja Basis report: 'Wards with most containment zones lagging in civic facilities'

<u>June 30, 2020</u>

Of 4,853 residents' complaints final 12 months these 5 wards reported 1,984, whereas 5,371 complaints concerning overflowing drains (of the overall 14,351) have been acquired from these wards, the report provides. (Representational)

Areas with poor civic amenities are extra prone to the proliferation of <u>Covid-19</u> instances, a examine carried out by NGO Praja Basis has discovered.

The Basis's annual report on the standing of civic points in Mumbai, launched Tuesday, states the highest 5 administrative wards in Mumbai — L (Kurla), S (Bhandup), Okay west (Andheri), M-east (Govandi, Mankhurd) and R south (Kandivali) — with the utmost focus of containment zones, reported essentially the most complaints associated to water scarcity, drain overflowing, and unattended rubbish.

In response to the info compiled by the BMC's centralised grievance registration system final 12 months, 1,420 complaints on water scarcity, of the overall 3,084 recorded throughout the town, have been registered from these 5 wards, the report states.

Of 4,853 residents' complaints final 12 months these 5 wards reported 1,984, whereas 5,371 complaints concerning overflowing drains (of the overall 14,351) have been acquired from these wards, the report provides. "On the time of Covid-19 outbreak, water, sanitation and hygiene are crucial elements in stopping the unfold of the virus. Information of complaints from final 12 months reveals that wards having most containment zones had a scarcity of water and bathroom associated points. In absence of water and correct sanitation amenities, sustaining hygiene is troublesome," Milind Mhaske, director of Praja Basis, stated.

In response to the NGO, a survey carried out in 2015 by the BMC had highlighted grave inequality in amenities supplied at public and neighborhood bathrooms. Findings of the survey additionally confirmed that solely 28 per cent of bathrooms have been related to piped sewerage methods, whereas 78 per cent didn't have a correct water connection. Fifty-eight per cent of those bathrooms have been working with out electrical energy that made them unusable at evening, it states.

"Along with water and sanitation, lack of correct stable waste administration additionally contributes to poor hygiene and will increase the incidence of ailments," stated Mhaske.

Questioning the civic physique's declare of 100 per cent door-to-door rubbish assortment, the Praja report says, residents' complaints confirmed in any other case. Of the overall 17,116 SWM complaints recorded final 12 months, 36 per cent have been associated to the rubbish not being collected, the report states. Out of whole SWM complaints, 41 per cent have been acquired from 9 wards together with F-North (Matunga, Seweree), P-North (Malad), P-South (Goregaon), R-North (Dahisar), R-South (Kandivali), M-West (Chembur), N (Ghatkopar), L (Kurla) and S (Bhandup). These wards have greater than 50 per cent slum inhabitants.

## **Criticism redressal**

As per BMC's centralised grievance registration system information, the Praja Basis report has discovered of 1.28 civic complaints registered in 2019 at the very least 96 per cent have been closed by BMC. In 2017 and 2018, when BMC acquired 92,329 and 1.16 lakh civic complaints, respectively, solely 83 per cent have been addressed. The complaints have been on civic points like roads, drainage, water provide, rubbish assortment, pest management, and nuisance as a result of vagrants. The time taken to resolve the problems additionally improved from 46 days in 2018 to 30 days in 2019, the report states.
